DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's amendments overcame the closest art, the previously cited Cai and Soliman. Though Cai's invention uses a multiplier, it is done during the processing of digital signals, and no art could be found that would suggest such a modification. Soliman's invention combines an intermediate frequency signal with a Gaussian random-noise signal, but uses an adder rather than a multiplier for the combining. No art could be found to suggest the use of a multiplier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew E. Heneghan, whose telephone number is
